Education

The University of Texas at Arlington

Bachelor of Science in Computer Science

Arlington, TX

Expected Dec 2026

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Web Development, Python Programming

Projects

APIWatch: Full-Stack API Monitoring Platform

React, TypeScript, Vite, Tailwind CSS, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, Alembic, Docker, GitHub Actions

- Built a full-stack API monitoring and incident-management platform supporting scheduled HTTP checks, status and response validation, custom headers, JSON bodies, timeouts, and multiple HTTP methods.
- Implemented five-minute scheduled monitoring with bounded concurrency, automatic incidents after three consecutive failures, automatic recovery, and 24-hour, 7-day, 30-day, and all-time uptime and latency analytics.
- Developed cookie-based JWT authentication, owner-scoped resources, SSRF-aware URL validation, deterministic Incident Insights, public status pages, and automated CI/testing with pytest, Vitest, and Docker.

StayWise: AI-Assisted Short-Term Rental Marketplace

Senior Design – In Progress

Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Resend SMTP, Vercel

- Collaborating in a senior design team to build a short-term rental marketplace where guests can search listings, save properties, reserve stays, and receive explainable recommendations.
- Implementing Supabase authentication, PostgreSQL-backed listings, Storage, Row Level Security, host listing management, and guest reservation workflows.
- Building reservation date-conflict protection, recommendation scoring, production-style authentication emails with Resend SMTP, and cloud deployment through Vercel.

Inventory Management System

Python, Object-Oriented Programming, Data Structures

- Developed a Python-based inventory management system to track products, manage orders, update stock quantities, and generate organized inventory reports.
- Applied object-oriented programming and efficient data structures to organize product and order information and maintain accurate inventory records.
- Implemented structured product lookup, inventory updates, and input validation to improve reliability and simplify day-to-day inventory management.

Professional Experience

Amazon

Warehouse Associate

Texas

Apr 2020 – Present

- Manage high-volume inventory operations while maintaining accuracy, organization, and operational efficiency.
- Collaborate with team members to meet productivity, quality, and workplace safety targets in a fast-paced environment.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, HTML/CSS

Frontend: React, Next.js, Vite, Tailwind CSS, React Router, Recharts, Axios

Backend: FastAPI, SQLAlchemy, Pydantic, Alembic, REST APIs, httpx

Databases & Services: PostgreSQL, SQLite, Supabase

Tools & Testing: Git, GitHub, Linux, Bash, Docker, GitHub Actions, pytest, Vitest, Ruff, ESLint, Prettier

Cloud & Deployment: Vercel, Render, Neon

Certifications

Introduction to Python Programming

Coursera

Java Programming and Software Engineering Fundamentals
